## **Statement:**

*Dubai International Private School is an inclusive school, all students feel welcome, accepted, and safe and valued. The school is keen to identify all barriers which restrict students' achievement, participation and learning, and will take action to remove obstacles which lead to educational exclusion.*

*Dubai International Private School advocates the inclusion of all children including those with Special Education needs and gifted and talented as fully participating learners. As an inclusive school DIPS provides a safe physical surrounding, a rigor curriculum, and welcomed positive learning environment that reflect the needs of all students. The school ensures that inclusion of students with Special Educational Needs is facilitated through adherence to the Special Education services adopted by the school.*

The school works in alignment with the KHDA requirements for identifying students who require access to specialist provision including those with special educational needs and disabilities and special gifts and talents. These students are welcomed and are supported by special provision.

The following issues are aspects of provision that require special consideration to ensure the educational inclusiveness of DIPS:

- effectiveness of identification procedures
- appropriateness of curriculum modification systems
- impact of specific intervention or personal support mechanisms
- use of feedback from monitoring and assessment processes.

Developing inclusion will involve governors, the Superintendent, the school staff, students, professionals, parents and the wider community.
